

UNITED INDUSTRIAL SERVICES, INC.

THE UPDATE

WELCOME

Welcome to United’s Update – a quarterly newsletter meant to highlight some extra information for our customers. We want to use this space to showcase our products, feature our industries, and share a little more about us.

We’ve made it one whole year since starting our newsletter. We have enjoyed the creativity this paper has brought to our team, and we hope you have enjoyed taking a break from the more serious things to read it. This newsletter includes some tips for staying well, an introduction to a new partnership, and highlights what we’ve been working on.

So, grab your pumpkin spice latte (or whatever you drink to keep you cozy), and read through this update. If you see anything that catches your eye, feel free to reach out to us.

TIPS & TRICKS

With school starting and cooler weather upon us, autumn coincides with cold and flu season. Here are a few things you can do to help protect yourself from the cold and flu bug.

1. Get enough sleep.
2. Eat well.
3. Exercise regularly.
4. Wash your hands.
5. Avoid touching your face.
6. Reduce stress.
7. Stay warm.

PRODUCT SPOTLIGHT - WEG

United has recently partnered with WEG to give our customers access to motors that meet a range of needs. United continues to be dedicated to our mission of minimizing customer downtime by providing quality repairs and products for industry-essential equipment.

WEG is a global company that is one of the largest manufacturers of electrical equipment in the world. WEG offers many different motors across multiple applications. If you need a motor, WEG has one that will work for you.

ODDS AND ENDS

This portion of the newsletter celebrates what makes us feel *gourd*.

What We Are Eating:

- pumpkin bread
- apple pie
- leftover Halloween candy
- Thanksgiving dinner

What We Are Doing:

- going to fall festivals
- planning Halloween costumes
- going apple picking
- carving pumpkins

What We Are Watching:

- leaves falling
- spooky movies
- our favorite teams

INDUSTRY FEATURE - AGGREGATE MINING

Aggregate mining is the process of extracting sand, gravel, limestone rock from where it naturally occurs. This industry touches nearly every aspect of modern infrastructure like roads, hiking trails, buildings, and much more!

This industry is tough on equipment due to the harsh environments machines are required to operate in. At United, we have the skills to rebuild, repair, and/or replace any equipment necessary to keep operations up and running.

NOTEWORTHY NEWS

While things continue to change, some things stay the same and for that we are thankful. At United, we have consistently been surrounded by excellent employees, and that hasn't changed in nearly 40 years.

Our employees are the highlight of our company. We have a mixture of master craftsmen, machinists, welders, mechanics, and fabricators. Over half of them have been with United for 15 or more years.

Old and new - we celebrate it all. Our lead technicians have over 40 years of experience in their respective fields, and our newest employees are coming from high school. We enjoy learning from those with experience and teaching those that are new and interested.

If you aren't already, **follow us** on LinkedIn and Facebook for updates and information about our products and industries.
